Clause 16 Should the Customer cancel any order after the despatch of such order or part thereof, the Company reserves the right to recover all and any costs incurred whether directly or indirectly in consequence of such cancellation.

Clause 18 No responsibility is accepted by the Company for loss or damage arising out of the Customer’s negligent or unskilled use of material, or failure to comply with any instructions for use given by the Company.

Customer’s account. Where applicable, this quotation is based upon required supplies of petroleum-based products being
freely locally available for the manufacture, supply, application and completion of the contract. If during the currency of the
contract there shall be a curtailment or disruption in the local supply of petroleum-based products outside the reasonable

to complete the execution of the contract but shall be entitled to an extension of time for completion, and shall further be
entitled to such adjustment of the amount of the contract price as in the opinion of the Company in its sole and absolute
discretion shall be deemed reasonable, regard being had to all material and relevant factors directly affected by such

interpretation of the agreement concluded between the two parties, or in respect of any other matters whatsoever,
including and without limiting the generality of the aforesaid, the performance by either party of its obligations under the
contract shall be settled by Arbitration Act No. 42 of 1965, as amended from time to time. The appointment of the
arbitrator shall be made by the chairman for the time being of the Association of Arbitrators (Southern Africa). The latest

PART A - CONTRACT PRICE ADJUSTMENT

CLAUSE 1

The value of each certificate / Tax Invoice issued by the Company shall be increased or decreased by the amount obtained by multiplying the quoted rate/s or price/s, less the value of bitumen and modifying agents, by the contract price adjustment factor, rounded off to the fourth decimal place, determined according to the following formula:

\[ (1 - x) \left[ \frac{a}{L_0} + \frac{b}{P_0} + \frac{c}{M_0} + \frac{d}{F_0} \right] \]

in which the symbols have the following meanings:

1.1 “X” shall be the proportion of “Ac” which is not subject to adjustment, the proportion of which shall not exceed 0,15.

1.2 “a”, “b”, and “c” shall be the coefficients stated in Clauses 3 hereof which are deemed, irrespective of the actual constituents of the work, to represent the proportionate value of labour, plant, materials and fuel respectively. The arithmetic sum of “a” “b”, “c” and “d” shall in all cases be unity.

1.3 “L” shall be the Labour Index and shall be the “Consumer Price Index - All Items” for the urban area nearest the site, as published in the Statistical News Release P0141.1, Table 4.1 of Statistics South Africa.

1.4 “P” shall be the Plant Index, and shall be the “Civil Engineering Plant Index” as published in the Statistical News Release P0142.1, Table 16 of Statistics South Africa.

1.5 “M” shall be the Materials Index, and shall be the “Civil Engineering Materials Index” as published in the Statistical News Release P0142.1, Table 15 of Statistics South Africa.

1.6. “F” shall be the Fuel Index, and shall be the “Diesel Index” as published in the Statistical News Release P0141.1, Table 3.1 of Statistics South Africa.

1.7. The suffix “o” denotes the basic indices applicable to the base month, which shall be the month prior to the month in which falls the closing date of the quotation.

1.8. The suffix “t” denotes the current indices applicable to the month in which falls the last day of the period in which the relevant payment certificate/Tax Invoice relates.

1.9. If any index relevant to any particular certificate / Tax Invoice is not known at the time the certificate / Tax Invoice is valued, the value of such index shall be estimated.

CLAUSE 2

For the purpose of calculating the adjustment to the value of the relevant certificates / Tax Invoices, the amount “Ac” shall be determined by the formula.

\[ Ac = T - S - D - E - G - Ap \]

in which the symbols have the following meaning:

2.1. “T” shall be the total value of preliminary and general items, work done, and materials on site for the certificate / Tax Invoice under consideration, before the deduction of any retention monies or repayments of advances, and before any adjustments made in terms of this schedule.

2.2. “S” shall be the aggregate of (i), (ii), and (iii) referred to below and included in “T”;

(i) the amounts actually expended and substituted for any P.C. amounts;

(ii) the value of any work done by Nominated Sub-Contractors;

(iii) the value of any extra or additional work where special arrangements for price adjustments in respect of those amounts were made and recorded at the time the work was ordered.

2.3. “D” shall be the value of work included in “T” done at new rates, where those rates are not based on labour, plant or materials costs in force at the time of tendering. Generally, new rates may be based on current costs and de-escalated to the base month of the indices, in which case work done at these rates shall not be included in the value of “D”.

2.4. “E” shall be the amount included in “T” paid for any daywork executed at cost plus percentage allowances.

2.5 “G” shall be the amount included in “T” for bitumen and modifying agents and dealt with as “special materials” under Rise and Fall.

Clause 3

THE COEFFICIENTS REQUIRED FOR CLAUSE 1 ABOVE ARE AS FOLLOWS, WHERE X = 0,15 :

\[ a = .22 \quad b = .40 \quad c = .20 \quad d = .18 \]
